

NOTICE: Severe IPI Congestion Continues at Norfolk CFS

Dear Business Partner,

Our partner CFS in Norfolk, Forward Air, continues experiencing heavy congestion at their facility. This is causing severe delay on the recovery of IPI loads and devanning. In addition to this, we continue to see a lack of driver capacity to this market as well.

To avoid further service delays, we recommend rerouting cargo to another IPI destination such as DC, Richmond or another destination that may fit your client's needs.

If you have any questions, please feel free to contact your STG representative.
